

Tuesday 2nd May 2023 - Online Learning

Morning Year 5,

Here is some of the learning activities we would be doing in school today. I have put an English SPAG task, a maths task and a Computing task for you to have a go at. For the computing task, you will need your purple mash log in - which you should know already!

There is no expectation for you to bring this learning in with you tomorrow.

See more details below for the activities.

Take care and see you all tomorrow,

Mr Morris 😊

English SPAG

Following on from our learning of fronted adverbials, I would like you to have a go at the activities set. I have put a fronted adverbials PowerPoint on here too to remind you in case you are unsure.

Maths

This week, we will be starting to look at angles. In maths fluency sessions last week, we began recapping what angles were and how we can classify them.

Using the PowerPoint to remind yourself about angles, have a go at the worksheets provided. There are answers on there too so you can check it when you are done.

Computing

On purple mash, we have set you a 2do which is all about coding and using strings within software.

Have a go at the 2do. Remember, there are helpful videos to help you complete the tasks set.
